

PRASA 2014 proceedings

Proceedings of the 2014 PRASA, RobMech and AfLaT International Joint Symposium, 27-28 November 2014, Cape Town, South Africa, Edited by M. Puttkammer and R. Eiselen, ISBN 978-0-620-62617-0.

Download the entire [proceedings](#) as a single pdf.

Individual papers (pdf format)

[Context-based Online Policy Instantiation for Multiple Tasks and Changing Environments](#)

Benjamin Rosman

[Semi-supervised Training for Lecture Transcription in Resource-scarce Environments](#)

Pieter de Villiers, Etienne Barnard, Charl van Heerden and Petri Jooste

[Topic Modelling for Short Text](#)

Jocelyn Mazarura, Alta de Waal, Franz Kanfer and Sollie Millard

[Vision-based Hand Motion Detection for Intent Recognition](#)

Thierry Luhandjula, Quentin Williams and Barend van Wyk

[Single-trial EEG Discrimination between Five Hand Movement Imagery and Execution towards the Control of a Prosthetic/Orthotic Hand using a Brain-computer Interface](#)

Abdul-Khaaliq Mohamed and Lester John

[Comparison of Two Detection Algorithms for Spot Tracking in Fluorescence Microscopy Images](#)

Matsilele Mabaso, Daniel Withey and Bhekisipho Twala

[Automatic Infarct Planimetry by Means of Swarm-based Clustering](#)

Pieter van Vuuren and Derick van Vuuren

[A two-Stage Fuzzy c-Means Clustering Algorithm for Lung Segmentation](#)

Oluwakorede Oluyide, Serestina Viriri and Jules-Raymond Tapamo

[Retinal Vessel Segmentation Based on Difference Image and K-Means Clustering](#)

Temitope Mapayi, Serestina Viriri and Jules-Raymond Tapamo

[Long-term Tracking of Multiple Interacting Pedestrians using a Single Camera](#)

Mogomotsi Keaikitse, Willie Brink and Natasha Govender

[Development of the Electronics Pod for an Underwater Remotely Operated Vehicle](#)

Roger de Smidt and Stephen Marais

[Development of a Mechatronic Transmission Control System for a Formula Student Drivetrain](#)

Alexander Nöertemann, Theo van Niekerk and Udo Becker

[Improvements on a Prosthetic Hand - The UKZN Touch Hand](#)

Gregory Jones and Riaan Stopforth

[The Case for a General Purpose, First Response Rescue Robot](#)

Tracy Booysen and Thomas Mathew

[The Design of a Rugged, Low-Cost, Man-Packable Urban Search and Rescue Robotic System](#)

Thomas Mathew, Greig Knox, W.K. Fong, Tracy Booysen and Stephen Marais

[Automatic Classification of Sheep Behaviour Using 3-Axis Accelerometer Data](#)

Jacques Marais, Solomon Petrus Le Roux, Riaan Wolhuter and Thomas Niesler

[Temporal Classification of FACS AUs using SURF Descriptors](#)

Christine Trewick and Hima Vadapalli

[A Study on the Sensitivity of Photogrammetric Camera Calibration and Stitching](#)

Jason de Villiers and Fred Nicolls

[A Comparative Study of Genetic Programming and Grammatical Evolution for Evolving Data Structures](#)

Kevin Igwe and Nelishia Pillay

[Aligning Audio Samples from the South African Parliament with Hansard Transcriptions](#)

Neil Kleynhans and Febe de Wet

[Number Pronunciation in a Multilingual Environment and Implications for an ASR System](#)

Raymond Molapo and Etienne Barnard

[Automatic Segmentation and Clustering of Speech using Sparse Coding](#)

Wiehan Agenbag, Willie Smit and Thomas Niesler

[Visual Features in Varying Illumination for Enhancing SLAM in the Mining Environment](#)

Stephen Marais and Andre Nel

[Development of an Educational Process Control and Instrumentation System using Totally Integrated Automation \(TIA\) Approach](#)

John Fernandes and Theo van Niekerk

[A Vision-based Error Metric for Path Following Control](#)

Deon Sabatta

[Kinematics Analysis and Workspace Investigation of a Proposed Parallel Mechanism for Multi-Planar Operations](#)

Sameh Ghobashi, Khaled Abou-El-Hossein and Michael Ayomoh

[Development of a Two-wheel Balancing Robot using the STM32F3-Discovery Board as an Educational Platform for Traditional and Modern Control Schemes](#)

Phillip Rukidi, John Fernandes and Grant Phillips

[Genetic Programming for Password Cracking](#)

Thulani Mashiane and Nelishia Pillay

[Comparing Support Vector Machine and Multinomial Naive Bayes for Named Entity Classification of South African languages](#)

Wildrich Fourie, J.V. Du Toit and Dirk P. Snyman

[Unsupervised Topic Modelling on South African Parliament Audio Data](#)

Neil Kleynhans

[SVM Classification of Dr Math Microtext](#)

Bertram Haskins and Reinhardt A. Botha

[Exploring Unsupervised Word Segmentation for Machine Translation in the South African Context](#)

Daniel Van Niekerk

[Phrase Chunking for South African Languages: an Investigation for Sesotho sa Leboa, Setswana, and Afrikaans](#)

Roald Eiselen

[An Investigation into Spoken Audio Topic Identification using the Fisher Corpus](#)

Neil Kleynhans

[Experiments with Syllable-based Zulu-English Machine Translation](#)

Friedel Wolff and Gideon Kotzé

[South African Sign Language Dataset Development and Translation: A Glove-based Approach](#)

Ben McInnes and Mohohlo Tsoeu

[An English to Xitsonga Statistical Machine Translation System for the Government Domain](#)

Cindy McKellar

[CHAMP: a Bespoke Integrated System for Mobile Manipulation](#)

Beatrice van Eden, Benjamin Rosman, Daniel Withey, Terence Ratshidaho, Mogomotsi Keaikitse, Ditebogo Masha, Ashley Kleinhans and Ahmed Shaik

[Interactive Energy Consumption Visualization](#)

Dalton Lunga, Sarah Ward and Nkosinathi Msimango

[A Novel Approach to Visual Password Schemes Using Tree Picture Grammars](#)

Benjamin Okundaye, Ian Sanders and Sigrid Ewert

[*Application of Multi-Objective Local Search to Hardware/Software Design Exploration*](#)

George Anderson and Tallman Nkgau

[*Performance Analysis of a Multilingual Directory Enquiries Application*](#)

Charl van Heerden, Marelie Davel and Etienne Barnard

[*Development of a Docking Mechanism for Self-reconfigurable Modular Robots*](#)

Patrick Muthui and Robyn Verrinder

[*Programmable Logic Control of an Electro-hydraulic System for a Reconfigurable Assembly Fixture used for Press Brake assembly*](#)

Olayinka Olabanji and Khumbulani Mpofu

[*Towards a Mobile Mapping Robot for Underground Mines*](#)

Tobias Neumann, Alexander Ferrein, Stephan Kallweit and Ingrid Scholl

[*Augmenting the L1 Tracker with Appearance Based Tracking Improvements*](#)

Charles Bradshaw, Fred Nicolls and Gerhard de Jager

[*Generation of Super-resolution Stills from Video*](#)

Bernardt Duvenhage

[*Comparison of Background Subtraction Techniques under Sudden Illumination Changes*](#)

Cornelius Reyneke, Philip Robinson and Andre Nel
